Executive summary

The final decision is GO WITH CONDITIONS with a score of 64/100. The comparable market price is 132.4 TND for the target package, against an estimated landed cost of 11.12 TND and an indicative gross margin of 121.28 TND. The decision remains subject to the verification conditions shown in this report.

Product analyzed

The 5W-30 4L motor oil is a standard automotive fluid essential for engine maintenance. Evidence from Chinese manufacturers indicates wholesale availability with prices ranging from approximately \$1.50 to \$4.00 per unit, depending on volume and specifications. In Tunisia, the product is readily available through multiple retail and wholesale channels, with prices typically ranging from 100 TND to 190 TND for 4L or 5L containers. Retained Tunisia retail price range: 147–184 TND.

Requested product	Huile moteur 5W-30 4L
Normalized product	5W-30 4L Motor Oil
Category	Automotive Fluids
Variant / model	Not available
Format / specifications	5W-30 viscosity, 4L volume
Market	Tunisia
Sourcing country	China

International sourcing

Market comparability

Market comparability: Medium. Sourced products share key characteristics with the analyzed product. Different packaging volumes detected; margins must be read on the normalized price per litre/kilo. Comparable market reference: $33.100 \text{ TND/L} \times 4 \text{ L} = 132.4 \text{ TND}$.

Competitive analysis

Competition level: Insufficient data. Brands: Total, Yacco. Sellers: Bestoil, Karhabtk.

Profitability analysis

Comparable market reference: $33.100 \text{ TND/L} \times 4 \text{ L} = 132.4 \text{ TND}$.

Metric	Value
Analyzed quantity	1000
Unit purchase price	4.65 TND
Analyzed package	4 L
Equivalent product cost 4 L	4.65 TND
Estimated landed cost	11.12 TND
Recommended selling price	132.4 TND
Gross margin / unit	121.28 TND
Margin %	91.6%
Gross profit	121280 TND
Hypothetical ad budget	300–500 TND
Profit after Ads	120880 TND

Comparable market reference: $33.100 \text{ TND/L} \times 4 \text{ L} = 132.4 \text{ TND}$.

Profitability is an estimate, not a guarantee.

USD/TND rate and logistics charges are configured assumptions.

Commercial potential

Score: 58/100

Ads / marketing potential

Score: 60/100. Qualitative analysis: no CPC, CPA, ROAS or search-volume values are invented.

Main risks

- Automotive fluids are subject to strict quality and safety regulations in Tunisia.
- Brand loyalty is a significant barrier to entry in this category.
- Fewer than 3 validated Tunisia sourcing price-backed offers were found.
- Fewer than 3 validated Tunisia price-backed supplier/source results were found.
- Fewer than 3 validated China sourcing price-backed offers were found.
- Fewer than 3 validated China price-backed supplier/source results were found.
- Retail market coverage may be incomplete.

GO / NO GO decision

GO WITH CONDITIONS

Score: 64/100 · Confidence: Medium

Theoretical profitability appears high based on the available data. Gross margin: 91.6%. Competition: Insufficient data. Obtain a firm supplier quote, confirm actual logistics and customs costs, verify standards and quality, confirm Tunisian wholesale prices, and validate commercial demand.

Detailed scoring

Criterion	Score	Justification
Market demand	10/20	Seller and price references were observed in Tunisia.
Margin	19/20	Gross margin is about 91.6%. Economic score was adjusted by a data reliability penalty of -1 point(s).
Sourcing	9/15	Retained sourcing offers; logistics remain to be confirmed.
Competition	7/15	Competition is assessed from the number of observed sellers and brands.
Ads potential	6/10	Qualitative reading only; no CPC, CPA, ROAS or search-volume data is invented.
Recurrence	8/10	Repurchase potential is inferred from available category signals.
Differentiation	2/5	No clear differentiator is documented in the sources.
Risk management	3/5	Risk control is limited: fewer than three suppliers; insufficient competition coverage.
